## **DETAILED ACTION**

### ***Drawings***

It appears that there were no drawings submitted with the application. Applicant should submit drawings consistent with the drawings in the international application for consideration.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1078888. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1078888. EP '888 discloses two embodiments, as does applicant, the first of which includes an eccentric screw pump 10, drive 18, suction inlet 28, casing 16 containing the drive, rotatable cylindrical screen 22, filtrate outlet 26, flocculant supply 30, and screw conveyor 14 acting as a “feeding element”. The second embodiment which claim 2 reads on includes an eccentric screw 10, sludge outlet 56, a rotatably cylindrically

mounted screen 22, feeding means 50,52, 30a, filtrate discharge 26, and pump shaft 14 carrying a screw conveyor. Applicant asserts EP '888 (pub date 28 Feb 2001) is not prior art under 35 USC 102b due to "international priority date" of 21 June 2001. Applicant is confusing a foreign priority date (21 June 2001) with an international application date (17 June 2002). EP '888 is more than one year before 17 June 2002. As such, it is prior art under 35 USC 102b. Applicant asserts that EP '888 is further deficient since it fails to include feeding elements arranged on the inside wall of the screen. However, fig. 2c shows that the screw is on the inside of the screen wall. As such, the claims are anticipated. It should be noted that "arranged on the inside wall of the screen" is broader than reciting the feeding elements are attached directly to the inside wall of the screen.

### ***Response to Arguments***

4. Applicant's arguments filed 02 April 2008 have been fully considered but they are not persuasive. Applicant's arguments are addressed in the body of the rejection.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
